

OFX Post-Conversion Troubleshooting Guide

Top 3 Post-Conversion Troubleshooting Issues

This resource document is designed to help you troubleshoot the three most common post-conversion issues. These materials include instructions for both QuickBooks and Quicken. All links are clickable in the PDF.

Issue 1: Duplicate Transactions After Reconnecting

Symptoms You Can Use to Identify the Issue

The most common issue is duplicate transactions.

You may see that your register is out of balance or that you are being asked to add an adjustment during reconciliation.

Fix the Issue

- 1 If the duplicate transactions have not been added to the register, you can delete them individually prior to accepting.
- 2 If the transactions have already been added to the register, you can delete them from the register individually or in groups.

QuickBooks Knowledge Base Article

Delete transactions from Online Banking Center:

Quicken Details

If there are too many transactions to delete individually, or you find it difficult to follow the instructions to delete multiple transactions, restore a backup file and download the transactions again.

Important: If the backup was not made right before following the conversion instructions, you must manually delete the transactions.

Issue 2: Duplicate Accounts After Reconnecting

Symptoms You Can Use to Identify the Issue

You are unable to link to an existing account, you are prompted to create a new account, or you are only given the choice to add a new account.

Fix the Issue

- 1 First, confirm that all accounts have been deactivated, including inactive (QuickBooks) or hidden (Quicken) accounts.
- 2 Then, if you're working in QuickBooks, delete any downloaded transactions that do not match the register in the Online Banking Center. If you're working in Quicken, delete the duplicate accounts.
- 3 Finally, repeat the reconnection steps.

Issue 3: Connected/Reconnected the Incorrect Account

Symptoms You Can Use to Identify the Issue

Your transactions are downloading into the wrong account.

Fix the Issue

- 1 First, open the account register for the incorrectly linked account.
- 2 If the transactions have not yet been accepted into the register in QuickBooks, delete them in the Online Banking Center. Then, deactivate the account. If the transactions have not yet been accepted into the register in Quicken, delete the transactions.
- 3 If the transactions have already been added to the register in Quicken or QuickBooks, restore a backup.
- 4 Finally, repeat the reconnection steps. Be sure that you link to the correct account when reconnecting.
